

Xtreme PhotoStory on CD & DVD 7

The most exciting way to experience pictures and videos on TV

The award-crowned bestseller creates widescreen cinematic TV events full of effects from your photos and videos!

Ideal for beginners!

With 1-click automations you can create slideshows with cinema-ready effects, virtual camera movements and individually selected background music. Experience your slideshows on TV, on your PC or on your own album page on the web.

NEW!

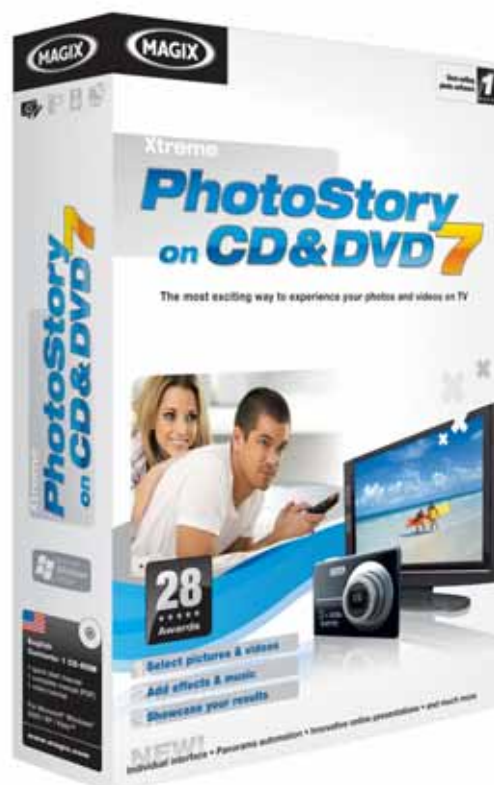

Better appearance with **individual user interface** in two color choices.

The **program interface** adjusts to every screen format (e.g. laptop).

Automatic panorama functions for impressive photomontages, and much more.

3:2 formats (for example from SLR camera or a scan) now show up **filling the screen automatically** depending on the format of the slideshow either 4:3 or 16:9.

Experience your DVD project complete with a menu as interactive, **high resolution slideshow** in your own MAGIX Online Album.

Design easily and quickly using great ideas and amazing templates

With **MAGIX Xtreme PhotoStory on CD & DVD 7** your photos and videos will become TV events full of effects as if on their own – ready for the marquee and in wide screen format.

The 28-time award winner simply offers more!

Experience the unfathomed ways to present photos – fantastic camera movements and zooms, fades, animations and music, which fit to every occasion. In the shortest space of time create personal masterpieces and show your most beautiful photo memories on TV or on your PC and on the web!

1. Select photos & videos

Import your photos and videos from digital cameras, mobiles, memory cards, CDs & DVDs and all other sources – with just one click.

2. Add effects & music

Completely automatically or individually – it's your choice! With useful assistants your photos will be transformed into an experience ready for the big screen.

3. The result: Memories full of life!

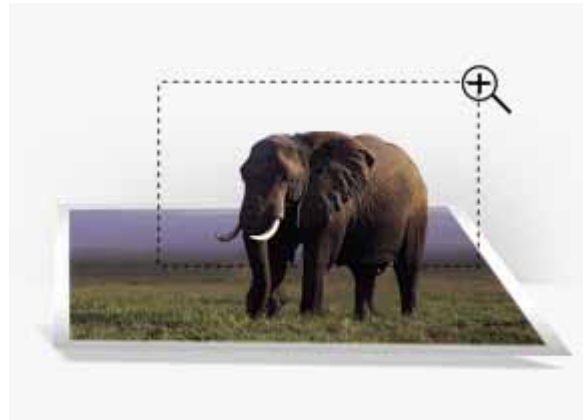

Enjoy the show together with the family, friends and neighbors. You can experience your memories on TV using a DVD player or on the big screen. With automatic, adjustable DVD menus – excitement guaranteed!

Design individually

The new reworked **Media Pool** makes creating individual slideshows easier than ever. Using selected decorations, camera movements focusing on the details and zooms your photos & videos will be even more full of life.

The right style for very occasion: **MAGIX MovieShow Maker**

Present your most beautiful photo memories in unusual slideshow styles! You will find templates with anything from silent movie to music video, which, in combination with your photos will help you create a slideshow in no time at all. Included in the templates are fades, effects, decorations, sounds and background music, which will help transform your photos into a movie.

Animated decorative elements

In the Internet you can find countless animated graphics that you can now use as deco elements for your photos. The size, position and color can be adjusted according to your wishes just like with any other decoration element in our giant Media Pool.

Looking good in any format

Whether horizontal or portrait, your photos fit perfectly into the image flow and will receive the background color and decorations of your choice to avoid black bars.

NEW: Automatic panorama functions

Exciting all around: Up to six individual photos can be automatically combined into a great panoramic image. The software takes care of exposure and corrects any lens and perspective distortions. The panorama tool can be used for any other photo montage in order to create exciting widescreen images.

During viewing, a virtual camera movement glides over your widescreen images, so that you can view the photo in detail as a screen-filling impression.

Easily optimize sound and image

You can optimize every photo and every sound recording. The image optimization ranges from quick optimizations, for example brightness and contrast, to color substitution for creating moody pictures in all shades of color.

Spoken commentary can be noticeably improved through stereo and room simulation effects. Declicker and Dehisser help remove clicks and noises from voiceovers.

The right sound for every mood: MAGIX Soundtrack Maker

Without music, your effect-filled slideshow is only half-finished. Music gives the slideshow that oomph – a real movie needs a soundtrack! With the MAGIX Soundtrack Maker you can dub your pictures thematically with various emotions within one musical genre. Individual sections of the slideshow will be differently accented: from mysterious to happy, completely as you wish.

NEW: With **MAGIX Screenshare** it is now possible to communicate with other users live over the Internet using the contents of your own screen. Experience what it means for two PCs to interact, to see, to show and create together. With MAGIX Screenshare you can connect online with selected users* to easily offer and receive help with software.

*Can be used with the guest module by PC users without MAGIX software. Free download at www.magix.com

NEW: Interactive online presentation

A slideshow can also be presented in a free MAGIX Online Album. The upload takes place directly from within the program. Countless new Flash templates result in even more appealing website designs. In addition, you can now create mixed media albums, where both photos **and** videos can be placed and viewed.

Unique: Upload the interactive start menu of your disc project and several slideshows to the Internet: the 1:1 image of a DVD on the web – for worldwide connection to friends and family.

Every slideshow as Flash™ video

Flash™ videos offer small file size and optimal quality for the web, and for this reason are the state-of-the-art in the Internet. To let you embed every slideshow as a Flash™ video on an HTML page MAGIX Online Album has an export function for its Flash™ video player. Perfect for quickly embedding a video in your personal websites or Internet portals.

NEW: magix.info – Multimedia Knowledge Community

Exchange tips and tricks with other users! Ask questions at any time and get the information a flash – professionals and experienced users answer your questions. Show and discuss together with other MAGIX users around the world. In addition: Online-Workshops, buyer's advice and more worth knowing about MAGIX products.

User interface

All functions in overview

Import & Record

The improved program performance on PCs with Dual Core processors is exciting! The hardware acceleration ensures for free-flowing smooth fullscreen playback even with processor-heavy image effects like transitions, cropped image views, position switches, etc.

Load photos and videos from digital cameras	Also for 16:9 photos from modern wide-angle cameras
Import images from cell phones, photo CD/DVDs, memory cards , etc.	Also supports Kodak [®] photo CD (PCD) and external drives via USB 1&2, serial interface and much more.
Scan in without paper prints	Direct scanner port (TWAIN [®] compatible)
Record voiceovers	Record your voice via a microphone in sync to the images
Automatic format adjustment	NEW! Automatically shows images in 3:2 format without black bars (4:3 or 16:9). Ideal for digital SLR cameras and scanned-in pictures.

Optimize & Improve

Whoever owns a widescreen laptop can now enjoy MAGIX Software even more: The program optimally fills out every widescreen TFT& display optimally, for example 16:10. No space is left unused.

1-click image optimization	Auto exposure/color, selective brightness, focus, brightness/contrast, white balance, color shade, red eye correction, crop, transform
Fine adjustment for photos & videos	Precise image size, position, angle and reflection
Automatic warning for image quality	Guarantees the best resolution for every target medium(e.g. TV)
Sound optimization	Prepare background music and spoken commentary: stereo widening, equalizer, noise removal and much more.
Top quality for TV, PC, projector	100 % true colors, fullscreen without edge cutting and flickering, etc.
Intuitive user interface	NEW! Stylish design (2 color alternatives), beginner mode, screen-filling even on widescreen laptops
Non-destructive editing	Practical & secure: original files stay unchanged.

Arrange & Create

Slideshows with subtitles and short descriptions make your projects more exciting and make them more fun. If you enjoy writing, you can come up with witty titles and texts, especially since the font resolution has been noticeably improved.

Overview, Storyboard, Timeline	Sort, turn around, arrange and dub all photos
Automatic MovieShow Maker	10 styles for great slideshows with rhythmic image transitions, etc.
Media Pool	Easily load, optimize and subtitle photos, videos and music and add effects (camera movements, zoom, fades)

Decorations	60 elements and animations incl. sound (speech bubbles, comics, frames, etc.)
Panorama automatization	NEW! Realistic panorama images and creative photo montages incl. exposure recognition
Refine your upright photos	Avoid black bars: your own backgrounds, colors and creative effects
1-click animations	Liven up individual photos: Lens, color effects and much more.
Crossfade effects	60 templates: Picture-in-picture, 3D power effects, etc.
Video effects & camera movements	25 templates for special effects, zooms and panorama pans
Title generator	IMPROVED! Ultra-sharp texts with 30 templates (for example, flowing opening/closing credits, subtitles)
MAGIX Soundtrack Maker	Creates individual background music with mood changes that fit to your scenes (happy, suspensful, cool, etc.)
Thematic background music	Included in the program: Background music in various genres, fitting songs for celebrations and parties
Faster performance	NEW! Improved performance for smooth fullscreen viewing using hardware acceleration

Burn & Present

The Burn Assistant brings your project directly to a DVD. Many format settings for your slideshow will be automatically set, encoder settings are pre-defined and lead you to the best possible results – for high quality images and smooth movements in any resolution .

Interactive DVD menus (4:3 and 16:9)	40 individual adjustable templates with intros, backgrounds (video/music), animations, and much more, incl. real-time preview
Menus from your own motifs	5 templates for DVD menus from motifs out of your slideshow (3D animations, flowing intro transitions and much more)
Burn slideshows for TV	Burn wizard for all disc types (DVD, (S)VCD, miniDVD etc.)
Photo CD/DVD-ROMs	Immortalizes photo archives with included PC playback software on the disc
Universal file burn module	For copying your slideshow discs, project backups, etc.
Double layer DVDs	For more, longer slideshows per disc
Present DVD image online	NEW! Interactively present mixed media albums (photos, videos, music) with a selection menu just like with a DVD
MAGIX Screenshare	NEW! Show screen contents to others on their PC via the Internet. Ideal for personal communication and reciprocal help.
MAGIX Community	NEW! Exchange knowledge with users with similar interests
